

Oxford County Advertiser.

FRIDAY, JANUARY 9, 1885.

OF INTEREST TO ADVERTISERS.

Our advertisers are always welcome to examine our list of actual subscribers. It is right that they should know the exact extent of our circulation, and therefore they can better judge what they are buying when they contract for space in the columns of the Advertiser. An exact record of every edition issued since the paper came under its present management can be shown at this office. Those interested are invited to make a personal examination, or, if not convenient, a sworn statement will be forwarded by its publisher, upon application, covering any period of the past two and one half years that they may wish to examine.

The average circulation per week for the four editions of Sept., 1884, was 1,668. The average circulation for the four editions for the month of Nov., 1884, was 1,670. The average circulation for the four editions for the month of Dec., 1884, was 1,676. The average circulation of the two last editions in Jan., 1885, was 1,644. Total number of papers issued for the past sixteen weeks, 27,819 copies for the same time.

After the supper there was a social dance, the music being furnished by Mr. John Crawford and wife.

The house of Mr. Nelson Stevens at Trap Corner came near being destroyed by fire the first of last week. The fire originated from a defect in the burning chimney. Messrs. Morrison and Bright have out and paraded all the pine timber on Mount Main, some 100 M or more, belonging to S. D. Davis of Cleveland. This was rather a formidable looking job to many people as the sides of the mountain are steep and rugged, but both these gentlemen being practical loggers and used to being in hard spots. The timber is to be hauled to Proctor's Mill.

Ward Monroe is at home and prepared to do first-class Crayon Work in copying and engraving. He has recently sent a finely executed picture of the late A. O. Noyes of Norway, which was done by him.

We are informed that Messrs. Cobb & Haggood are willing to work all the hard wood timber that they can get hold of at a slight reduction from the market prices. And it is more than probable that W. W. Watson will do something at the box business in his shop.

Joe Haggood and wife have returned from an extended trip up country.

The ice harvest is at present going on. There is an abundant crop but the harvesters in this section are not numerous. The ice is about 13 inches thick.
